***STRUCTURE FISHING GENEVA'S  
SMALLMOUTH BASS***

Club President Mark O'Neill is an accomplished angler, guide, marine electronics and fishing educator with years of on-the-water knowledge and fishing experience. His home body of water is Lake Geneva, WI and he fishes this deep clear water lake throughout the year and will be discussing the underwater structure and habitat and game fish that exist in this great body of water.

Mark's approach to fishing is more technical than most, but he also has the ability to translate that technology in a manner easy for one to understand. He presents numerous seminars and electronics classes in the Midwest and Canada, with the concentration being how to use today's technology to catch more fish. O'Neill also offers on-the-water electronics training throughout the open water season.

Mark's sponsors include: Lowrance, Ranger Boats, St. Croix Rods, Cisco Fishing Systems, Mercury, MotorGuide, Dr. Sonar, Optima Batteries and P-Line. You may learn more about Mark, his classes, fishing reports, etc. at [structure-fishing.com](http://structure-fishing.com).

This presentation will show you how to use today's electronics to fish Geneva's unique clear water and structure to catch trophy brown bass.

**Illinois Club Meetings are on the 2<sup>nd</sup> Wednesdays 6:00 PM**
