

Wednesday, April 13th at 6:00 PM
Mark O'Neill – Structure-Fishing
Marine Electronics –
Using Technology for Geneva Trophies

Mark O'Neill spends much of his time educating fellow anglers on Lowrance electronics, mapping and fishing with seminars, instructional classes, and on-the-water training sessions that he performs in the Midwest and Canada. His home body of water is Lake Geneva, WI and he fishes this deep clear body of water throughout the year.

He is aided greatly by his Lowrance electronics to get a much better understanding of what lies below the surface. As a licensed guide and pro staff member for Lowrance, Ranger Boats, Mercury Marine, St. Croix Rod and Optima Batteries to name a few, Mark is continually exposed to the latest technologies as they become available and he demonstrates and shares those technologies at the Lowrance seminars, classes, and demonstrates during on-the-water training and guide trips.

This presentation will focus on the new technologies that now exist and how he uses these technologies to fish Lake Geneva while targeting multi-species trophies. Mark will discuss ActiveTarget installation, setup, and options for powering your marine electronics, which will interest us all in considering the growing power demand of today's sophisticated electronics. This will be an insightful presentation you might not find at other venues and will need as you move into some of the new technologies no matter the brand you purchase.

Learn more about Mark, his classes, on-the-water training, fishing reports, and other resources at: www.structure-fishing.com.

Wednesday, May 11th at 6:00 PM
